IN THE CLAIMS:

✓✓✓✓✓
Please replace claims 1, 21, 35, 37, 39 and 55 as follows:

1. (Six Times Amended) An optical recording medium, comprising at least one optical recording layer, the optical recording layer including an optical recording material that changes a state of photo-induced birefringence in response to a recording light that is externally controlled from the optical recording medium to rotate a polarization angle of the recording light, a portion of the recording layer that changes a state of photo-induced birefringence substantially acting optically as a half-wave plate; and
a substrate which sustains the optical recording layer,
